Who We Are

AUSCERT is a trusted, not-for-profit cyber security organisation with 30+ years of global expertise, helping members prevent, detect, respond to, and mitigate threats.

We provide unbiased support and expert recommendations to your organisation through our comprehensive range of services included in your membership, including Incident Support, Vulnerability Management, and Threat Intelligence.

Joining as a member means you gain access to a service provider that stands shoulder-to-shoulder with you against cyber threats.

Membership Inclusions

	Small	Medium	Large	Enterprise
Number of Network Users	Up to 200	Up to 2000	Up to 5000	Over 5000
Incident Support	✓	✓	✓	✓
Vulnerability Management	✓	✓	✓	✓
Threat Intelligence	✓	✓	✓	✓
Complimentary Conference Registration	50% off one registration	1	2	3
Unlimited Member Priced Conference Registrations	✓	✓	✓	✓
15% Discount on Training	✓	✓	✓	✓
15% Discount on GRC Services	✓	✓	✓	✓

Current pricing is available on our website here: auscert.org.au/become-a-member/

Incident Support

With over three decades of experience and a strong network of international partners, we draw on global threat intelligence to support your organisation in times of need.

24/7 Support Hotline

Access to our highly skilled team of analysts and developers who possess various certifications, including SANS GIAC, and are available to assist you through email, Slack, or our 24/7 telephone support hotline.

Phishing Takedown Management

AUSCERT's Phishing Takedown service is designed to assist your organisation from a multitude of phishing attacks. If your organisation's brand is used on a phishing web site, or if spear phishing targets your organisation, AUSCERT can utilise its worldwide contact network to request the removal of the malicious website.

Malware & Log Analysis

Malware and log analysis support is available for your organisation through AUSCERT via our toolkits and analysis platforms. This entails identifying threats, recommending best practices and mitigation approaches against the threat.

Support and Assistance

AUSCERT provides expert support during cyber incidents by actively gathering intelligence from diverse and trusted sources to identify and respond to threats relevant to your organisation. Our team works swiftly, following established protocols to help achieve timely and effective resolutions. We act as a trusted sounding board offering tailored advice, technical guidance, and collaborative support throughout the incident response process. Unlike many vendors, we don't place limits on the number of requests you can make.

Vulnerability Management

We assist organisations by identifying and addressing system weaknesses with trusted, expert advice.

Security Bulletins

Members receive curated vulnerability notices from major platforms and vendors to support proactive risk management. Published daily and backed by AUSCERT's specialised vulnerability research, this service ensures members stay ahead of emerging risks with reliable, actionable information.

Each bulletin offers a consistently formatted summary, CVE identifiers, CVSS scores, and expert remediation advice to streamline patching efforts and prioritise threats effectively. Members can create multiple customised email subscriptions tailored to their operating systems and environments or subscribe to a daily digest email.

Member Security Incident Notifications (MSINs)

Members receive notifications detailing incidents observed in their publicly facing infrastructure that could be directly impacting their organisation. The AUSCERT team analyses data from diverse sources to identify vulnerabilities relevant to members based their nominated IPs and domains.

MSINs detail identified network/endpoint alerts and security incident reports, combined with recommended mitigation strategies. This organisation-specific service enables members to swiftly and effectively respond to vulnerabilities.

Critical MSINs

Members are issued critical notifications when serious vulnerabilities, such as zero-day threats, are detected. The AUSCERT team research current and emerging threats to determine potential impact to members based on their nominated IPs and domains.

Critical MSINs are flagged for urgent action and contain details of the threat, references and mitigation strategies for high-priority risks.

Early Warning SMS Alerts

Members can opt-in to receive SMS alerts that advise when a Critical MSIN has been issued. This enables rapid assessment and mitigation of these emerging threats.

Threat Intelligence

Our threat intelligence helps organisations to prevent, detect, and respond to cyber threats by leveraging our global network of trusted communities.

Sensitive Information Alert (SIA)

Members are notified when leaked credentials or other sensitive material related to their organisation is identified. The AUSCERT team utilises a wide range of sources, including the dark web, ransomware leak sites, international CERTs, and trusted partners.

The alerts typically involve compromised credentials, such as usernames in the form of email addresses and associated authentication strings (hash or passwords). This sensitive information is provided via an encrypted file for your internal review and action.

Malicious URL Feed

Members are provided with a live feed of malicious URLs identified within the Asia-Pacific region. The AUSCERT team collates phishing and malware URLs identified by our analysts, trusted sources and verified member contributions.

To ensure a high-confidence feed, the content is frequently updated based upon ongoing analysis. The feed can be added to your firewall's blocklist, web proxy, content filters, IDS/IPS, and SIEM, to prevent or detect compromises to your network.

AusMISP

Members are provided with access to our MISP instance, which contains a shared feed of curated threat intelligence. The AUSCERT team examines and collates threat samples and indicators sourced from trusted partners and the member community, including the *ACSC CTIS (Cyber Threat Intelligence Sharing) feed.

This high-confidence data includes technical and non-technical information about malware, incidents, attackers and intelligence. This information can be utilised to enhance your network security by integrating into defensive controls like SIEMs, firewalls, IDS/IPS, ACLs, web proxies, and mail filters.

AUSCERT Daily Intelligence Report (ADIR)

Members can keep informed on current cyber security news with this daily email update. The AUSCERT team curates this report from multiple reliable sources to summarise the most important news of the day.

Each Friday a "Week in Review" edition is issued, highlighting the essential cyber news, AUSCERT announcements and notable security bulletins from the week.

Conference Benefits

AUSCERT's annual conference is globally recognised for its leadership and excellence within the cyber security industry.

For over twenty five amazing years, we have proudly hosted Australia's longest-running cyber security conference, gaining international recognition for our diverse line-up of speakers, tutorials, workshops, and events.

Founded to connect like-minded information security professionals, our mission has always been to foster collaboration, share knowledge, and strengthen our industry for the greater good. Over the years, we have successfully cultivated a vibrant community of the brightest minds and most influential leaders in cyber security.

The AUSCERT Conference at a Glance

- 900+ attendees
- 90+ speakers
- 50+ sponsors
- Two Days of Tutorials
- Two Days of Presentations
- Network with Members

Member Benefits

	Small	Medium	Large	Enterprise
Complimentary Conference Registration	50% off one registration	1	2	3
Unlimited Member Priced Conference Registrations	✓	✓	✓	✓

Add-On Services

Enhance your AUSCERT membership with optional add-ons, available at an additional cost.

Training Courses

AUSCERT delivers engaging and interactive training for all skill levels and professions. These courses provide essential knowledge in a highly engaging format, offering a more impactful learning experience.

Visit our website for the full list of training courses.

Members receive 15% off training and GRC services!

Governance, Risk & Compliance

AUSCERT offers expert advice and consultations and can aid your organisation in understanding the intricacies of Governance, Risk, and Compliance (GRC), improving your cyber security stance in alignment with your business objectives.

Maturity Assessments

Build and enhance compliance with the globally recognised NIST CSF framework to strengthen cyber resilience.

Cyber Incident Response Plans (CIRP)

Develop or refine a tailored CIRP to ensure effective response and swift recovery from cyber incidents.

Tabletop Exercises

Test and improve your organisation's incident response readiness, identify gaps, and boost resilience under pressure.
